Subject: RE: agenda for Q4 mitigation meetings on Tues
Attachments: 11-1-22 WORKING DRAFT Draft Internal - Baseline FIFRA Eco Mitigation Guidance (1).docx

Nguyen, Khue has shared a OneDrive for Business file with you. To view it, click the link below.

 Agenda for Q4 PID Mitigation Meetings.11.7.2022.docx

Hi all,

Hope everyone had a nice weekend. This is very last minute, and I apologize for not getting this out earlier today: attached please find the agenda for tomorrow's Q4 PID mitigation meetings (10 am to noon; 2 pm to 4 pm). The agenda contains the risk and benefit rankings for the Q4 cases, as well as PRD's best guess at which baseline mitigation measures will apply at the moment. There are certain mitigation items that still need to be worked out, and I flagged a few questions in comment bubbles.

The agenda is a shared version, if you need to make edits, please do so in track changes.

Thanks,

Subject: heads up for Q4 mitigation meetings on Tues

Hello TM/MBC, DCNA, etofenprox, and norflurazon BEAD, EFED, and PRD teams,

Happy Friday! I hope everyone is well.

You may have noticed two invites on your calendar for this Tues titled "Q4 PID Mitigation" (10 am to noon, and 2 pm to 4 pm). Maybe you wondered what those were about, and what we are doing that could be taking 4 hrs.

As you know, there are various larger OPP efforts to be more proactive in meeting our ESA obligations. I am part of the FIFRA baseline eco mitigation workgroup. The goal of the FIFRA baseline eco mitigation workgroup was to come up with guidance for risk managers and chemical teams for baseline mitigation that could be applied to protect non-target organisms that would also be directionally correct in terms of protecting endangered species. We developed baseline eco mitigation based on different categories of risk and benefits (high, medium, low). See the attached working draft for more information.

TM/MBC, DCNA, etofenprox, and norflurazon are all going out with PIDs in Q4, and will have baseline FIFRA eco mitigation applied to them. Our goal for Tues is to determine which measures those might be for the four cases. We are gathering all 4 teams together in order to be consistent in terms of our approach for risk/benefit ranking and for risk management.

Agenda items for Tuesday:

- 1) Determine where TM/MBC, etofenprox, DCNA, and norflurazon are in terms of the eco risk ranking (high, medium, low)
- 2) Determine where these chems are in terms of the benefits ranking (high, medium, low)
- 3) And based on the risk and benefits rankings, determine which baseline mitigation measures would apply for each case.

A more detailed agenda will be sent out soon. But please come to the Tues sessions prepared to discuss the risks, the benefits, and your thoughts the respective rankings for your cases.

Enjoy your weekend, and talk to you next week!

Thanks,
